August, 2024

To whom it may concern,

I am pleased to write this letter of recommendation for future employment for Alexa Thompson. During Bay Cliff's 2024 Summer Therapy Camp, Alexa was employed as the camp's Recreation Instructor, in which I was her supervisor. During that time, Alexa designed, planned, and facilitated many recreational activities for a wide variety of children with differing abilities.

Bay Cliff serves children ages 6-17 years old, with disabilities varying from ADHD or Autism to Cerebral Palsy. From the very start of camp, Alexa displayed a passion for teaching these campers how to recreate in ways that were accessible to them. She immediately took to the team dynamic created within the staff each summer through her outgoing and friendly personality. Within the Activities team, she was an active participant and was always first to volunteer in other ways around camp. She was always willing to step into other spaces as needed such as volunteering to assist with therapy activities or helping the counselors within their units. She was present around camp and always did anything she could to ensure a positive experience for every camper.

In terms of my direct supervision of Alexa, she was always on time and present in all Activity team meetings and could always be found in her Rec spaces whenever her responsibilities required her to be. She was also very receptive to and acted on all feedback on her performance as the Rec Instructor or her weekly lesson plans of activities she would create for each week with the campers.

Please feel free to reach out to me with any further inquiries as I believe Alexa would be an asset to your team.

Sincerely,

Ryan Gooch
